

Education

MDes Master of Design / University of California, Berkeley / 2025–2026

BASc Systems Design Engineering / University of Waterloo / 2019–2024

Skills

Prototyping & Fabrication

SolidWorks · Fusion 360 · 3D printing · Laser cutting · CNC Milling · Wood shop · Electronics · Microcontrollers (Arduino, ESP32) · Sewing

Human Factors & UX Research

Usability testing · Cognitive task analysis · Heuristic evaluations · User research · Human-machine interaction · Validation & verification testing · Regulatory compliance · MIL-STD 1472 · NUREG-0700

UX Design

Figma · Adobe Suite · Journey mapping · Information architecture · Wireframing & prototyping · Interaction design · Visual hierarchy & layout · Design systems

Experience

Human Factors Engineering Associate · Tetra Tech · Jul. 2024 – Oct. 2025

- Evaluated how interfaces support operators' sensory, cognitive, and physical needs; uncovered usability issues in control rooms and facilities; ensured designs met regulatory requirements.
- Synthesized technical constraints into clear, human-centred design requirements for engineering teams.

Human Factors Engineering Intern · CMC Electronics · Jul. 2023 – Sept. 2023

- Investigated key human-machine interaction challenges of emerging VTOL/air taxi technology; translated them into design recommendations for cockpit systems.

Craftsmanship Engineering Intern · Tesla · Jan. 2023 – Apr. 2023

- Defined craftsmanship targets/hardware UX across multiple vehicle systems on 300+ interior trim, controls, and exterior components, identifying and prioritizing issues that impact the customer's perception of quality.

Physical Product Design Intern · Leonardo Industrial Design · Jan. 2022 – Apr. 2022

- Designed intuitive attachment systems and accessories for a modular furniture line.
- Concepted, sketched, and prototyped accessible magnetic product packaging for tremor-damping glove.

Solar Car Interiors Lead · University of Waterloo Midnight Sun · Apr. 2020 – Oct. 2021

- Led concept design, prototyping, and user testing of steering wheel, vehicle control panel, and interior door components (armrests, handles, trim, etc) to ensure a comfortable passenger experience.

Assistive Device Design Intern · Plant3r · Aug. 2021 – Oct. 2021

- Led handle and trigger redesign of home farming assistive tool for people with mobility issues. Started a usability testing initiative, guiding the remote team to test with >15 participants.

UX Research Intern · Essential Accessibility · May 2021 – Aug. 2021

- Led user research, interviews, design, and usability testing of new Design Evaluation platform released in 2022, where designers can assess their work for WCAG 2.0 accessibility compliance before development.

UX Design Intern · Wind River · Sept. 2020 – Dec. 2020

- Designed and conducted usability testing of two dev-ops tools shipped as part of Wind River Studio in 2021 that enable teams to run automated pipelines, and run remote tests on PCBs.

Engineering Associate Intern · AceAge · Jan. 2020 – Apr. 2020

- Sourced, tested, and implemented lubricants and bearing for cam mechanism, decreasing wear by 90%.
- Managed international product shipments by driving timelines and coordinating multi-stakeholder efforts.
